

Web Page on the Stock Market

Stock Market: Explained

An external video showcasing Netflix's take on what the stock market is

Home Page - Introduction

Explain what exactly the stock market is and how it operates. Include videos, external websites, "fun fact" function and a "key terms" table, to embellish the webpage.

Specific Stocks: In-depth

External links to specific stocks, allowing user to better their understanding

Page 1 - Investing Tips

Using a variety of images and text, ensure the user understands the basics of investing, from diversifying to managing their emotions. Also add a javascript function to show "age-based diversification", and how age should impact where savings should be allocated.

Page 3 - Why Invest

A page that persuades user the invest. It does so through the use of images and well-researched concepts like inflation. The page will also include an inflation calculation just to inform the user the urgency of inflation.

Extra Resources

In the case the user wants to learn more about the stock market in general, there will be a section dedicated to links to external resources.

Page 2 - Test Your Knowledge

A page dedicated to testing your knowledge on the the prior pages. It will be a combination of multiple choice questions and short answer questions, and will employ creative ways to get javascript to find the test scores.

Page 5 - Compound Calculator

Obviously this page will include a compound calculator, but it will also explain why and how exactly compound interest is so important. There will be an image of a graph just to prove the power of compounding.

Why Investing is Important
